EXPERIENCE

Programmer / Designer - [Cognitus Apps](#)

2017 - PRESENT

> Created various mobile apps reaching 50k+ users. Leading and overseeing technology and design.

Mentor / Teacher - [Coding Academy](#)

2017 - 2018

> Programming bootcamp in which students learn to develop web applications using JavaScript, VueJS, Node, MySql, MongoDB, and various other tools.

> In this position I personally taught and guided students throughout the course, helping with class assignments, homework and eventually a final project.

Java Backend Programmer - [Diwip / Tangelo](#)

2014 - 2016

> Working as a server side Java developer on social casino games, supporting 10,000+ concurrent users, using JavaEE, Mysql and couchBase to support game logic, data gathering and analysis.

SKILLS

- Programming:

  Javascript ES6, VueJS, Svelte, React, Cordova, JavaEE, NodeJS, SocketIO, MySQL, MongoDB, Couchbase.

- APIs:

  Facebook, GoogleMaps, Youtube.

- Design:

  UX/UI, HTML/CSS, Photoshop, 3Dsmax.

This resume contains only the most recent and relevant tools and skills I have acquired, but the list is actually much longer, this is a list of tools/skills I worked with either briefly or a while ago:

Java for Android Native, Unity3D, AS3, Flash, Illustrator, 3D Rendering, Modeling and texturing, Drawing, 2D art, Google App Engine, DataStore, C/C++.

MORE

A much slicker version of this resume is available [here](#), I made it with vanilla Javascript (can you believe it?) and deployed it on a Heroku server.

You can even fork it from [my Github account](#) along with other projects I worked on.

PERSONAL

I have many hobbies ranging from music to fire twirling, i'm a drummer in a band, I thrive on learning anything new and challenging, you can read about more projects I made in my [Blog](#), and you can also take a look at my [Stack Overflow Profile](#).
